## INTRODUCTION

---

I like to think of myself as a "technical potato"; meaning that I can be used for a lot of things.

I am an easy-learner, gets quickly engaged with new things and are self-going.

I am also service minded and enjoy working with both team mates and clients.

## LANGUAGES

---

Norwegian: Excellent writing and orally (native language)  
English: Very good, both writing and orally.

## HOBBIES AND INTERESTS

---

- **Soccer:** I played as an amateur for many years at Søndre Land IL. I have also travelled to UK to watch matches.
- **Running:** I like to go jogging and have attended several 10km runs and have also completed a half marathon. There is no ambitions besides pushing myself and keeping healthy.
- **Outdoor Life:** I enjoy fishing, specially trout. And i also like to go hiking and do non-competitive orienteering in the woods..
- **Music and Movies:** I listen to music all the time, and watch movies every now and then.
- **Technology:** Testing and learning new things is always fun and interesting.
- **Geneology:** I keep a record of my ancestors and in periods I continue my work. It's very time-consuming so it can og a long time between each period I work on it though.
- **Photography:** I enjoy taking pictures. Not at a professional level, but just for capturing the moment

## WORK EXPERIENCE

---

### **Technical Manager / Product Specialist / RPA Developer**

*Best of Breed AS (September 2007 – January 2021)*

I was recommended to apply to this job and I was the first to be hired after the general manager. Later on I became a part owner of the company. I started out as a Product specialist for third party print- and scan-solutions, but in a small company like this we had many roles in the beginning. For a while I handled orders, licenses, pre-sales, server administration, and support to mention some.

Main tasks through the years have been to support our resellers and the endusers in presales, installation and support of our products. Endusers were all kind of companies and organizations from just a few to many thousands of endusers.

I worked both remote and onsite at customers all over Norway. English, written and orally, was used daily to communicate with the manufacturers.

I also became a Technical Manager, and the last two years I started focusing on our new focus area; Robotic Process Automation (RPA) which opened new doors for me. In addition to develop RPA-processes I was also responsible to follow-up the development team in Ukraine.

### **IT Consultant**

*Netsolution AS (November 2002 – September 2007)*

My first full time job after completing my studies. The first years the company was named Office Integrasjon AS, but in 2006 we merged with Netsolution which already were located in the same building.

I worked as an IT-consultant with server admin- and support-tasks, both internally and for our customers. With my education I also got the responsibility to install printers, MFDs and third party solutions on them.

My network skills gave me a benefit that few other MFD-technician had at the time when everything became more digital.

## **IT Consultant / Network Supervisor**

*Siemens Business Services AS (November 2001 – November 2002)*

Got headhunted during my studies and worked part time monitoring networks in the army during the FIS-Basis Project. First level troubleshooting and escalation of incidents was the main part of the job.

## **2001 – Lundstad Buss, Hunndalen (Project)**

Me and a friend developed the website for a bus travelling agency.

## **2000 (June 1st – August 15th) – Fladsrud Matsenter A/S, Hov**

Summer intern as a checkout clerk with responsibility for my own cash balance.
